WILLIAM ROYAL GREER

Embellishments by Charles E. Calder

COPYRIGHT 1935
BY WILLIAM ROYAL GREER
ALL RIGHTS RESERVED

THE Dreadnaught is sturdily built and affords all the conveniences of a high class home for those who prefer boating to other forms of outing.

Fixed securely to the stern of any houseboat, this dooley will be a practical embellishment and will set your vessel aside from all others on the river.

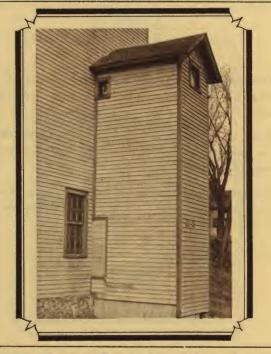

Constructed along simple yet classic lines, this "easer" blends well with any surrounding and matches the individuality of your boat.

66 P 3391

THE DREADNAUGHT

\$18.11

NONPARFIL

FEELING the need for a two-story dooley, the L. A. Vitorie Company engineers designed the Nonpareil.

Here is a johnnie providing unequalled ease of operation, convenience and excellence. This model may be used either with a vault or convenient metal receptacle placed in the lower story. In all larger cities our company maintains a staff of honeydumpers to empty and cleanse all Nonpareils used in this manner.

By a clever staggering of seats in each story, this model may be used either as a two-family biffie, or in place of the conventional set of two, without danger to either user.

66 P 8325

THE NONPAREIL

\$48.17

SODBUSTER

The Sodbuster was made expressly for hardy plainsmen and pioneers, who demanded security with their luxuries. Constructed from weathertight materials, assembled by craftsmen of long standing, it assures every possible comfort.

It is furnished with hand-high iron rails from the back door of the owner's house to the johnnie, defying its users to get lost in any type of storm. This dooley will be found useful also in countries visited by exceptionally dark nights and by inebriates.

66 P 4300

THE SODBUSTER

\$39.78

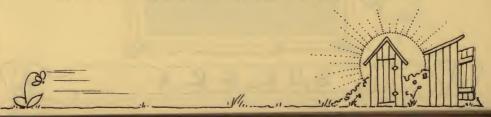

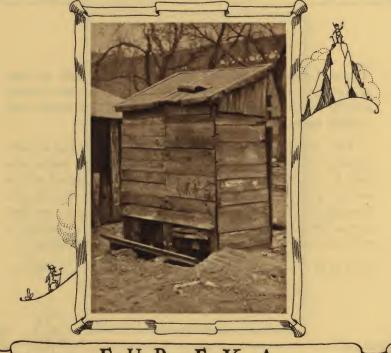

THESE Twins are designed for families who wish to take advantage of all kinds or any kind of weather but are suitable also for businesses having large numbers of customers with varying tastes.

One, with a deeply pitched roof to shed rains and an outopening door that will close automatically in high winds, was built for stormy weather. The other Twin is designed with a roof of slight angle, exposing more surface to Spring and Summer suns. The door is of the inward-opening type and carries the guarantee that one can open it and sit behind it with the utmost privacy and the maximum ventilation.

66 P 3434 THE ALL-WEATHER TWINS

\$63.21

EUREKA

THE Eureka is the last word in unique toilet construction, and is a time saver for those who place their doolies on hills.

The special open back permits the owner to find out whether or not the donnicker is in use. By merely looking through it he gains the desired information by counting the number of feet or legs seen there, thus saving tiresome walks up and down the hill every time the dooley is used.

The viewfinder in this model is so sensitive that a glass eye can see a wooden leg through it.

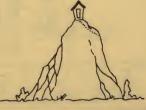

66 P 5000

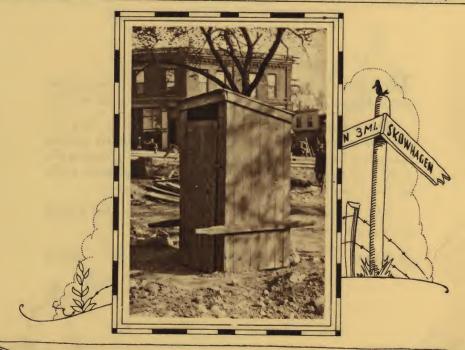

THE EUREKA

\$41.50

TOURIST

THE Tourist is the only portable jake made in this country. Reinforced to permit rough usage without damage, this palace of comfort will delight any man who is away from home.

In use, the cabinet is placed over any sewer manhole after removing the cover. With each Tourist we furnish charts of manhole markings in all cities of more than 10,000 in the United States. This prevents painful involvements with steam tunnels.

Charts showing manhole covers for other countries may be had at a nominal charge, permitting the Tourist's use on world tours.

66 P 9991

THE TOURIST

\$27.39

-AH

SPORTSMAN

ALL the advantages of the great out-of-doors coupled with a high class depository are offered by the Sportsman.

It affords a greater back-to-nature atmosphere because it can be set directly on the ground for quick stops, as well as being adapted for vault use permanently at your own home.

This convenient truck unit has been added to one of our best dooleys in such a manner that it swings into an out-ofthe-way position when the edifice is put in operation.

Despite this convenience it goes into action the moment the rest of your outfit is ready to travel.

Complete with a trailer hitch and pontoons for boat use, this structure is a bargain at any price.

66 P 0809

THE SPORTSMAN

\$76.56

WE offer the only suspended types of donnicker in America, and the Cliff Dweller is among our best models.

Constructed of the highest grade lumber, decorated in a variety of desirable two-tone effects and placed over a solid foundation, this dooley may be built on the shore of any convenient lake or stream and put into immediate operation.

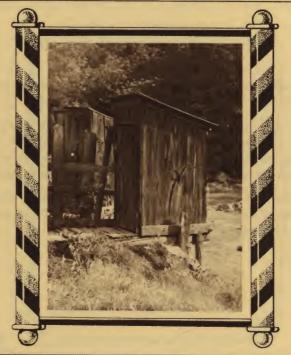

These relievers insure against the rise of flood waters in the Spring and prevent the discomfort of getting wet feet during the discharge of daily duties.

66 P 7525 THE CLIFF DWELLERS

\$38.61

THE VENETIANS

ONE cannot look at these doolies without thinking of sparkling sunbeams playing upon tiny ripples of the placid canals of Venice.

Designed by an Italian artist, our Venetian willies fairly exude the atmosphere of the city of canals. Sold either with stilts or guy wires, as shown in the illustrations, these models make suitable gifts for artistic friends.

66 P 9342 THE VENETIANS \$51.23

66 P 9343—with splashproof attachments \$55.63

(Running water as shown is not shipped with the Venetians)

THE New Era was designed to meet the demands arising from lake resorts. Summer residents have demanded something light and airy and here we give it to them.

It is built of the best 44 ounce tent canvas, heavily painted and shellacked until it is stretched tightly over its sturdy frame.

A border of high grade fly screen lets in an abundance of light and air. The simplicity in construction and assembly of this model enable you to have it in operation within seven and one-half hours after receiving the ready-cut materials.

66 P 1047

THE NEW ERA

\$37.33

BILLIKEN TWINS

THE Billiken Twins are unique in design due to a patented non-tippable feature. Braced so the center of gravity falls in the space between the units, it is almost impossible to upset this structure.

This improvement was created by our staff engineer, I. F. Oolthebois, after an unfortunate experience in his own dooley Hallowe'en night. Strapped together with heavy timbers in such a manner as to make the two johnnies a single building, these jakes defy any less than a gang of fifty medium-sized boys to tip them.

"Use your willie safely and comfortably on Hallowe'en", is our slogan.

66 P 5714

THE BILLIKEN TWINS

\$65.49

THE DEFENDER

WE produced The Defender to defend our laurels for having the highest class, best looking dooley at the lowest price.

Constructed of the best straight-grained peeled pine logs, securely fastened to a sturdy frame, it is the pride of our engineering staff.

The chinks are plugged by planed pine strips which have swelled into place. A tight-fitting door and a well built roof enable us to say this dooley is weather-tight and can be depended upon in any climate.

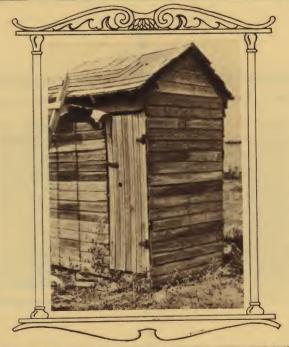

You are paying for a Defender, why not use one?

66 P 4315

THE DEFENDER

\$51.23

THE OLD RELIABLE

THE Old Reliable is sturdily built assuring comfort and pleasure usually found only in the higher priced willies.

Reliability and service are built into this model by experts of years standing. By constructing the Old Reliable of short lengths of unmatched lumber securely fastened to a sturdy frame, we are able to reduce the price greatly.

With a solid framework similar to that of the Leaning Tower and a cheaper but equally serviceable covering, we can offer it at half the price of any "easer" embodying the same quality.

44 P 5661

THE OLD RELIABLE

\$12.61

HEAVY DUTY MODEL

 $H_{ t ERE}$ is an outhouse to meet the needs of large families or groups. Constructed to withstand hard usage, this biffy is a three-holer on a nine-hole chassis and combines the utmost in sanitation with the three sterling attributes - durability, stability and reliability.

The three compartments are furnished with one of two sets of beautifully lithographed steel markers for the doors.

Please specify the set you desire.

No. 1—Three signs reading "men", "women", and "auxiliary".

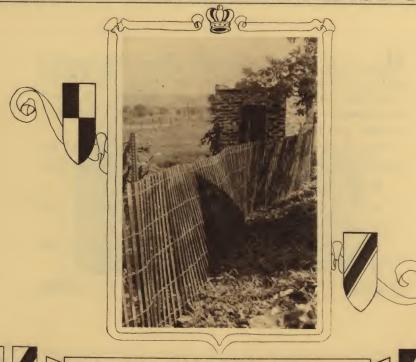

No. 2—Three signs reading "Family", "Guests", and "Neighbors or Strangers".

66 P 4488 HEAVY DUTY MODEL

\$75.00

THE Duke is a model which satisfies the most discriminating users. Just different enough to be distinctive, this johnnie is attracting attention on every hand.

Built of sturdy materials which have inspired many legends for solidarity and strength, it defies time and will retain its youthful appearance always.

Although the brick outhouse has been a standard subject of American conversation, and even has been used as a criterion for other types of construction, very few are in actual use today.

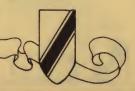

Be the first in your locality to avail yourself of this All-American institution at this price.

44 P 2998

THE DUKE

\$54.65

THE TROPICAL

THE need of a jake with a maximum ventilation inspired the Tropical. Requests of lake resorters for something cool and refreshing have resulted in this engineering masterpiece.

Unique construction allows a cross ventilation such as has been sought for years by manufacturers and users of similar products.

Revolutionary new principles allow a quantity and quality of light, never before hoped for in dooley fabrication, to be admitted freely.

The study of literature and art are cultural attainments which have been long recognized. Enjoy them to their utmost in the Tropical.

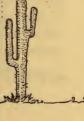

66 P 2356

THE TROPICAL

\$53.36

PRAIRIE SKIPPER

THE Prairie Skipper is an elegant dooley which promotes the maximum utility at the lowest possible price.

Standing on a prairie by itself, this closet will be a thing of beauty to any traveler.

Anchored by two heavy fence posts, set four feet deep, this dooley makes itself a haven in time of storm.

Sided, inside and out, with a good grade heavy-weight tar paper securely fixed with packing box strips, this donnicker is designed to withstand any climatic states found in prairie countries.

66 P 2757

THE PRAIRIE SKIPPER

\$13.15

THE FOUR POSTER

THE Fourposter is constructed to stand exceptionally hard usage and severe climatic conditions. Built around four heavy pine poles driven into the ground, this willie will virtually defy the elements.

By replacing the conventional hole-equipped seats with a log over which the patrons may hang, we have reached the utmost in efficiency. This feature eliminates the depreciation of toilet holes and allows all sections of the vault to be used. It is equipped also with a sapling backrest which makes it safe for a patron to fall asleep.

66 P 3392

THE FOURPOSTER

\$22.31

Here we see a combination that nobody could refuse. When our engineers found it, an expert tested the willie. He stepped out with a smile of satisfaction and relief, and said:

"This is what we've been looking for."

Then he dashed off a few trials just to show us how perfect the combination really was. We started production immediately and have worked three shifts a day ever since. This popularity must be warranted.

The garage-dooley-woodshed ensemble is of pastoral design with the garage built to resemble a barn. This illusion is complete even to such details as the perfectly reproduced haymow door.

66 P 2848

THE ENSEMBLE

\$312.00

CORINTHIAN

THE Corinthian offers a small willie built of the same excellent materials as the Heavy Duty model.

Painted an apple green, and embellished with our own crisscross lattice which conceals the doors, this model is one of the best two-holers on a six-hole frame that money can buy. A six-hole frame does not mean the edifice takes up the space of a six-holer, but that it has the same type and quality of reinforcement.

The Corinthian may, at a slight extra cost, be equipped with the scientific leaning angle of our best seller.

66 P 4494

THE CORINTHIAN

\$61.27

GENERAL DUTY

THE General Duty is designed to meet the need for a real family toilet. A mother who has growing children suggested this model, and already it has the approval of more than 100,000 families. It is popularly called "The Two-and-a-halfholer "

Two standard seats, 161/2 inches high, and a smaller one 61/2 inches lower, makes this truly a family convenience. Small children appreciate the comfort added by the extra seat. One of the standard size holes can be cut to oversize dimensions and fitted with a standard hole in a sliding plate, forming two seats of different sizes. This feature offers remarkable mobility of comfortable accommodations.

59 P 4231

THE GENERAL DUTY

\$35.91

LEANING TOWER

THE Leaning Tower is particularly adapted to medium sized families. Large spacious seats promote comfort, and the fool-proof door warrants adequate security against opening unexpectedly.

By disturbing the sense of equilibrium, the scientific angle of this johnnie assures the success of every visit, thus improving the patron's health.

This model was not designed in a day. Its sturdy construction and material insure durability and utility combined with beauty for many years. We pride ourselves that of 10,000 users not one has complained of failure in operation of the Leaning Tower's scientific angle.

33 P 4617

THE LEANING TOWER

\$35.00

The Patrician

Wo

THE Patrician adds the final touch which makes elite surroundings well-bred. Constructed in the best possible manner and decorated beautifully, this model embellishes any location.

In certain communities this model has revolutionized the art of landscaping. Several owners were so delighted upon receiving their Patricians they ordered them placed prominently on their front lawns, rather than on the usual sites reserved for them in the back yards. This is the biffie we dreamed of for years before we found it and is one any user will be proud to own.

66 P 6460

THE PATRICIAN

\$75.25

PRECISION

THE Precision is a johnnie of just the right capacity, the exact size of door and the proper amount of air circulation. It appeals to the business mind because nothing is wasted.

Elimination of waste has enabled us to place this toilet on the market at a price we are proud to quote.

You may buy this cabinet d'aisance with the assurance that you'll be proud of it under any conditions.

66 P 4447

THE PRECISION

\$13.49

The DELIGHT

THE Delight is a cozy dooley intended for families with small children. It is equipped with a juvenile seat built of specially unpainted pine lumber. The seat is ten inches from the floor, just right for growing children. This height was adopted as standard at the last convention of the American Society of Toileticians when they sat in session at Reading, Pa.

This dooley is built of special air-cured ship-lap and all the cracks are sealed with 1-inch by 2-inch pine strips. The lumber used is warranted against the knots falling out and leaving unsightly holes.

66 P 3654

THE DELIGHT

\$16.00

The End of the Trail

THE End of the Trail lends a homey atmosphere for those who desire peaceful thoughts while performing their daily duties. Walking down a fine path banked with choice flowers, one cannot help having beautiful thoughts while going out to make his morning call.

Two packages of flower seed, selected by the purchaser, are furnished with each End of the Trail. We suggest that, in addition, the owner plant a package of firebush seed to serve as a path marker during the winter months.

55 P 3300 THE END OF THE TRAIL
